

## **Gerdau**

Gerdau Long Steel North America is a dominate player in rebar with 60 strategically located reinforcing steel fabricating facilities including six in California, two in Arizona and two in Nevada.

Gerdau has an annual manufacturing capacity of more than 10 million tons of mill finished steel products, making it the second largest mini-mill steel producer and steel recycler in North America.

Gerdau is integral to products big and small, fabricating and installing 24,000 tons of concrete reinforcing steel for the 1,100-foot-tall Wilshire Grand in Los Angeles and donating the rebar needed for a children’s playground in downtown Phoenix.

Other major projects include:

- Tappan Zee Bridge replacement bridge
- Fort Lauderdale-Hollywood International Airport expansion
